

VISUPAC Star™ Storage and Review System

Know it all.

VISUPAC Star™ Storage and Review System

Your connection to enhanced workflow, better patient care.

Knowledge is power: the power to provide your patients with the best possible care in the most efficient way.

With the VISUPAC Star system, you can know virtually everything there is to know about a given patient's diagnostic test results with your Carl Zeiss Meditec instruments, all with a level of immediacy and convenience that saves time and lets you keep your priority on providing the highest level of patient care.

Connectivity is the key.

The VISUPAC Star system offers centralized storage and easy access to test results and clinical images generated by your Carl Zeiss Meditec instruments for each of your patients—from a single secure, easy-to-use workstation.

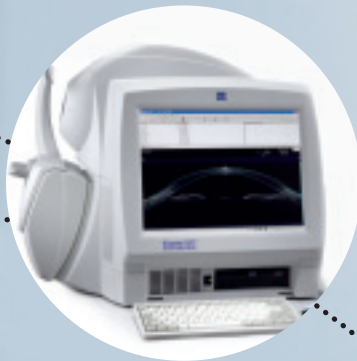

Now you can see your patient's images and test data all at once in a clear, easily managed digital format, instead of searching for output from different diagnostic modalities.

The VISUPAC Star system enables you to arrive at even more confident conclusions with greater convenience and a more effective use of existing resources.

With the VISUPAC Star system, you can count on:

- DICOM compatibility, offering the recognized industry standard for electronic management of patient data
- The ability to capture and store virtually any kind of image and/or report from most Carl Zeiss Meditec instruments
- Immediate access to patient data from a conveniently located central workstation
- A platform for connectivity to electronic medical records
- The capability to set up different user accounts and to track image and report modifications by specific users

For more information on how to connect with greater confidence and convenience, contact your Carl Zeiss Meditec representative today.
